1324	Light Blue	No	1321mm	657mm	146mm	18kg	1362kg	83 Ltrs	2
1325	Light Blue	No	1321mm	1321mm	146mm	32kg	2722kg	167 Ltrs	4

Description: A fluorinated polyethylene sump with deck surface large enough to store one, two or four 205Ltr drums. In the event of a leak, fluid is contained in the sump preventing contamination to the surrounding environment. Capable of withstanding chlorinated and other aggressive solvents.

Application: For storage of both steel and polyethylene drums and smaller containers which need to meet containment regulations and/or for general housekeeping purposes.

Product Features: The Spill Deck Model FD1, FD2 & FD4 helps you comply with containment regulations while storing steel and poly drums containing chlorinated or aggressive solvents. Capture leaks, drips, and spills to keep floors dry and workers safe.

- Up to 2,722kg UDL capacity is strong enough to support fully loaded steel or poly drums.
- Fluorination gas treatment allows this unit to survive in environments with chlorinated or aggressive chemicals that normal LLDPE is not compatible with.
- Molded-in sump catches leaks, drips and spills to help you comply with regulations and keep your storage area clean and safe.
- Linear Low-density Polyethylene construction resists UV rays, rust, corrosion and most chemicals for a long trouble-free life.
- Removable grate makes clean-up quick and easy.
- Helps you meet and comply with local container storage regulations

Disclaimers: Flammables Notice: If using this product with flammable liquids, please consider the regulations that apply to storage and handling of flammable liquids and the safety of this application, specifically flammable vapors, static discharge and heat sources.
